

NOJAX[®] Cellulose Casings

NOJAX[®] casings are made of regenerated cellulose and shirred in ready to use sticks. Barrier to microorganisms, they are permeable to smoke and water vapor and allow consistent quality of meat products processing.

NOJAX[®] casings are designed for high speed, automated production of hot dogs, dry mini salamis, cooked sausages and coarse ground sausages.

Increase your productivity!

- From standard to **long length**, **NOJAX[®]** casings shirring is optimized for the last stuffing equipment available on the market today.
- **High resistance** and superior **size uniformity** of our casing will ensure efficient high speed stuffing process.
- **EZ-PEEL[®]** treatment ensures perfect casing removal during high speed peeling.

NOJAX[®] casings offering is adapted to your needs:

- Our stick closures are designed to be used all stuffing machines.
- A variety of colors or stripes allows products identification and are used for food safety purposes.
- Our **multicolor printing** from 1 to 4 colors will highlight appearance of your final products.
- Self-Coloring** **NOJAX[®]** casings are available in Dark Cherry and Light Orange to impart food grade color to the surface of the stuffed product (** only for selected market).

NOJAX[®] casings users can benefit from Viskase[®] resources:

- Over 90 years of Worldwide experience in the meat processing industry.
- The Viskase[®] technical sales specialists and our technical service representatives are trained to provide technical assistance as well as new product and process optimization ideas.

Viskase[®] provides the best quality casings meeting the highest food safety standards!

We commit to continuous improvement management systems to insure safer products, better quality and full traceability.

NOJAX[®] Casings Features

Sizes	From 14 to 47 mm
Colors	Clear Wedzone Blue SENTINEL [®] With stripes
Treatments	REG (no treatment) E-Z PEEL [®] Self-coloring
Printing	From 1 to 4 colors Front and back side
Shirring	From 55' (17m) to 200' (61m)
Closed end	Open end, Closed end, Knotted end

Product Usage

NOJAX® casings are pre-moisturized and designed to be used as delivered. For optimum performance, the casing should be stuffed to its Recommended Stuffing Diameter (RSD). The values listed are not absolute diameters and should be verified in your specific application. Stuffing beyond the RSD may result in casing breakage.

NOJAX® casings (Americas)			
Casing Size	RSD (mm)	Casing Size	RSD (mm)
14	14.0 - 14.5	27	24.5 - 25.0

Storage & Handling

We recommend using **NOJAX**® casings within the year following delivery if properly stored.

Store **NOJAX**® casings in a cool, dry place avoiding proximity to heat sources as well as hot or freezing storage areas. Pre-humidified casings should be stored at temperatures between 4°C and 30°C (39°F and 86°F) and should remain sealed in original containers until ready for use. Unused casings should be kept in airtight bags and replaced in the original carton to maintain proper moisture content. Keep stock current by using the oldest stock first. To avoid possible damage, we recommend not using knives, sharp instruments and hooks to open cartons.
